

PHONECONTROL™

THE COMPLETE TELEPHONE MONITORING & MANAGEMENT SYSTEM

Many hotels and motels are still using a teleprinter or an out of date software program to bill telephone calls for their guests. **PHONECONTROL Affinity** logs calls from the telephone system, marks them up and inserts into the **Rezbook** property management system. You can also run retrospective reports.

You can define your own rates for all types of guests calls. Local calls may be 60c, 80c or more. Calls to 019 numbers, when guests dial up the internet, can now be billed at a timed rate – great if you have a limited number of lines and don't want congestion.

System requirements: Phonecontrol runs on the same PC as Rezbook. This PC needs to be Windows 2000 or better with 256Mb RAM, and a spare serial Com port to accept the Phone data.

PHONECONTROL AFFINITY COSTS

Size	Software	Remote Installation	1 st 12 months Remote support Option
< 60 rooms	\$795	\$245	\$115
< 100 rooms	\$1,195	\$295	\$165

Not expensive when you consider you will save 1 to 3 minutes on each guest checkout as you do not have to run a separate telephone account. You can easily mark up calls – lets charge an extra 10 cents per call and assume your guests are making 50 calls per day this is an extra \$1,825 p.a. We can come on site to install - this may be extra.
